## Questions the WG will address

- How can the standards needs of quality measures be aligned with the HITPC quality work group?
- What are appropriate standards for the definition of quality measures?
- What are appropriate standards for value-set definition?
- What entities should use what processes to validate, provide, and maintain quality measures and value sets?

## Questions the WG will address

- How should this work be aligned with information management for CDS—which has nearly identical dependencies on value sets?
- What standards should be used for the extraction and export of data for quality-measure computation?

## Timeline

---

- Kick off the re-chartered Clinical Quality workgroup by 2/15/2012.
- First work-group report - March HITSC meeting.
