

HIT Policy Committee
Quality Workgroup
Evaluation Form for Gretzky Report

As a measure development expert, your input in this workgroup is critical. This will serve as a guide as you read the Gretzky Report. Please note your comments on this document and send it to Thomas.tsang@hhs.gov by September 10, 2010.

Measure Priorities:

1. What is the most important measure concept within this domain that we should make sure is addressed by a quality measure?

2. Is it adequately addressed by the available measures listed here – or is it a ‘gap’ that we might need to fill?

3. What is the *second* most important measure concept in this category?

4. Of the potential measures listed for this category, what are the #1, #2, and #3 measures that you would recommend for possible inclusion in Stage 2?
 - 1)
 - 2)
 - 3)

5. Are there other potential measures that should be considered in this category? If possible, provide a description and a citation or contact information for an appropriate investigator with knowledge of this measure.

Methodologies:

1) What are the most important methodologic issues you believe we need to work on now?"

- "do you think any criteria do not belong?"

- are there domains listed here that should be dropped? Are there domains that should be added?

- "List your ideal e-measure concept for each domain"

- "are there any measure concepts (in use or in development) that you are aware of that are missing in each domain?"

- "vote for your favorite near-term measure for each domain"
